

# XR1300 Plug-in Throttle

## Fully Compatible

- ❖ Railcommand
- ❖ EASYDCC
- ❖ EasyCab

## Sturdy - Sleek - Simple

- ❖ Battery-free design
- ❖ Rugged, 2-conductor 1/4" headphone plug
- ❖ 12 foot coiled cord
- ❖ Socketed software for easy upgrades

## Simple and Fun To Use

- ❖ Keyboard address entry
- ❖ Single key access to 9 functions
- ❖ Single pushbutton for direction control
- ❖ Single-turn large speed knob

The new XR1300 plug-in throttle provides a convenient way to follow and control your train anywhere on the layout. The throttle is simple to operate and doesn't require complicated instructions or procedures. Just key in the desired number on the telephone-style keypad. Direction is changed with a large push button and speed is controlled with a conventional single turn knob. Walk-around memory is built-in. Unplug the throttle and the train continues to run.

Function buttons activate various auxiliary functions as well as control accessory decoders (system dependent).

The XR1300 works along with your existing throttles. Or you can take advantage of the quantity discounts to totally upgrade your layout upgrade to the new style.

The 12 foot coiled cord neatly retracts to 12 inches and the right angle 1/4 inch plug provides an extremely rugged and reliable connection to the fascia plate. You can actually stand on the plug and it will not break! Modular construction and plug-in software modules guarantee your throttles will never become obsolete. Upgrade by plugging in a new chip. Simple. Accept nothing less.
